About me

Hi. I'm Ux/UI designer with excellent taste for juicy works, I can understand where the work is depressing, and where it will sell. During my becoming I realized how important it is to have a difference between other designers.

I performed many works from different niches, where I gained experience in various moments. Also I collaborated with some studios, so it easy to me to understand teamwork and how important it is to come to a consensus.

And working freelance, I realize how important it is to be responsible for all the details of the project, even in stressful situations. All my contacts for communication with me I left above. I will be glad to cooperate with your company.
